HUNTING AND HARVEST REPORT

PREFACE

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from a population of all resident and nonresident elk license or permit holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS............The number of hunters who hunted one or more days
HUNTER DAYS........Sum of whole days or portions of days hunted
PERCENT SUCCESS....The number of successful hunters divided by the total number of hunters and multiplied by 100
LOWER..............Lower confidence limit at a level of confidence of 80 percent
POINT..............The estimated value
UPPER..............Upper confidence limit at a level of confidence of 80 percent
GEN ELK............An abbreviation for general elk license
GEN B10............An abbreviation for general elk license included in the nonresident B10 combination license
SP.................An abbreviation for special permit
UNKNOWN............A hunting or kill category where the season type was unknown or the activity illegal
UNKWN..............A symbol for unknown used to designate unknown sex
MISC. PERMITS......See Explanations

Explanations

The elk hunting and harvest statistics are estimates made from a sample of 55,484 questionnaires representing about 43 percent of all elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. The unknown license type given in the harvest sections is used to represent elk kills which could not be associated with a particular license/season type. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.

(CONTINUED)

PREFACE (Continued)

The category called "MISC. PERMIT" at the end of the report gives estimates of kills reported by special permit holders when the kill occured outside of their permit district(s). Many of these kills were legal on their general elk license.

All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

TIME PERIOD OF KILL REPORT

PREFACE

Survey Approach

Resident and nonresident elk license holders were randomly sampled from a population of all resident and nonresident elk license holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

UNKWN..............	A symbol for unknown used to designate unknown time period of kill
GEN ELK............	An abbreviation for general elk license
GEN B10............	An abbreviation for nonresident Big Game Combination licnese type B10
SP.................	An abbreviation for special permit preceeding the special permit district/option designation
SPECIAL............	Used in the regional or state summaries to designate combined special permits
UNKNOWN............	A license category where the license used to take the elk was unknown

Explanations

The elk time period of kill statistics are from a sample of 55,484 questionnaires representing about 43 percent of all elk licnese holders. No expansions or estimates are given. The percentages are from the actual sample data collected. Sample number killed in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the kill statistics in the hunting and harvest section of this report.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the various unknown categories given in the report. The unknown license type is used to represent elk kills which could not be associated with a particular licnese/season type. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

ANTLER STATISTICS

PREFACE

Survey Approach

Resident and nonresident elk license holders were randomly sampled from a population of all resident and nonresident elk license holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE...	The number of points on each side
FREQUENCY.....	The number of occurrences of the given antler type in the given hunting unit within the sample data obtained
PERCENT.......	The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are from a sample of 55,484 questionnaires representing about 43 percent of all elk licnese holders. No expansions or estimates are given. The frequencies and percentages are from the actual sample data collected for antlered elk. Total sample number killed in each hunting unit is given at the bottom of the frequency column. To obtain estimates of the actual number killed with a particular antler point count the percentages can be applied to the kill statistics for bulls in the hunting and harvest section of this report.

Because general elk only license holders were sampled and contacted at a different rate than most special elk license holders, a bias was introduced into the sample in any area where both general elk licenses and special elk permits could be used to take antlered elk. This situation was rare at the hunting district level but was more common at the regional level for the eastern regions having districts with permit-only hunting for antlered elk. Manual calculations may be used to calculate regional frequencies and percentages when more accurate statistics are needed.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

LICENSES & GENERAL INFORMATION

- Sportsmen may purchase only one elk license per year, which is included in the resident Sportsman's License and the nonresident Big Game Combination License.
- Only nonresidents holding a Big Game Combination License may hunt elk.
- Sportsmen harvesting an elk must, if required by the Department, physically return to the kill site for inspection and on demand show the complete head.

A5 vs. A7 License

- Sportsmen may not hold both an A-5 elk license and an A-7 antlerless elk license. Holders of an A-7 license must hunt antlerless elk only in the designated area and **may not** hunt elk anywhere else in the state (bull or antlerless) in the 1990 season. If successful in drawing an A-7 license, the sportsman must obtain the A-7 license by Sept. 1, or forfeit the A-7 license. Both residents and nonresidents may apply for the A-7 license. If after obtaining the A-7 license the season in the designated area closes before there is an opportunity to hunt, a refund will be given and an A-5 license may be purchased.

Elk Prerequisite

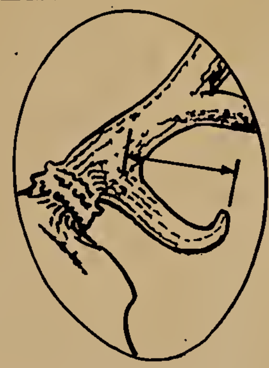
- Residents and nonresidents are required to purchase a general elk license prior to applying for a special elk permit. Applicants must list their 1990 general elk license number in the designated space on the 1990 special drawing application form, or their application will be eliminated from the elk special drawings.

Landowner Preference

- Montana landowners who qualify may receive preference in the elk permit and A-7 cow elk license special drawings to hunt on their own land. To qualify, the applicant must own 640 acres of contiguous land used by elk or where elk are known to occur at anytime during the year. If the permit is valid for a portion of the hunting district only, the landowner must own land within that portion. When applying landowner preference, the permit or A-7 cow elk license is valid only on land owned in fee title by the applicant within the hunting district applied for.
- Preference is available to resident and nonresident landowners and can be designated to a blood or marriage related individual or a person employed by the landowner. Only one person may use or designate preference in a partnership or corporation.

Definitions

- Antlered Bull - any elk having an antler or antlers of at least four inches in length measured from the top of the skull.
- Antlerless - a female or juvenile male with antlers less than four inches in length measured from the top of the skull.

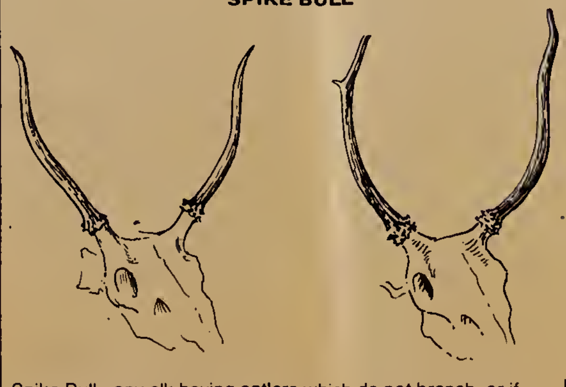


ANTLER POINT MEASURMENT

(Legal antler point must be 4 inches or more in length.)

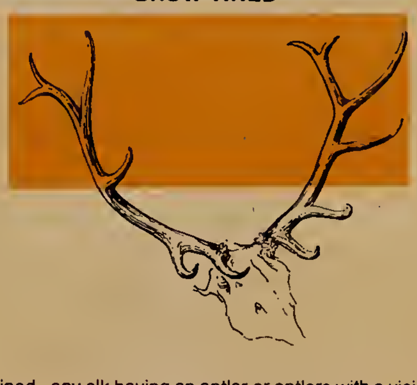
Montana has some elk hunting districts with special regulations governing the type of bull elk that is legal. The diagrams below are intended to assist the sportsmen in interpreting these special regulations.

SPIKE BULL



Spike Bull - any elk having antlers which do not branch, or if branched, branch is less than four inches long measured from the main antler.

BROW-TINED



Brow-Tined - any elk having an antler or antlers with a visible point on the lower half of either main beam that is greater than or equal to four (4) inches long.
